

SAFETY-FIRST CULTURE | REDUCED INJURY RATES

BEHAVIOURAL BASED SAFETY

1 DAY NON-CREDIT BEARING SHORT COURSE

During this short course participants will gain insight into how personal choices impacts on the safety culture of an organisation and within a team, and understand how this can predictably reduce injury rates and improve safety performance.

MODULES

- Introduction to Behavioural Safety
- The Safety Pyramid
- The Just Culture
- Influencing Behaviour
- Behavioural Based Theory
- Observation Systems and Conducting Observations

OUTCOMES

- Understand the safety pyramid and how it can be used as a tool to improve safety performance
- Understand the theory behind behaviour-based safety and how it was developed
- Conduct observations in a manner that will result in a cultural shift
- Understand the difference between unsafe behaviours, unsafe conditions, and near misses
- Identify positive safety observations
- Analyse safety data to develop improvement actions
- Review safety incidents in an objective manner to get to the real root causes
- Take responsibility for own safety and the impact you have on the safety of employees and colleagues

PARTICIPANT PROFILE

Employees and Managers at all levels of the organisation who are required to understand how individual behaviour impacts a safety culture.

3 REASONS WHY YOU SHOULD COMPLETE THIS COURSE

- 1 Behaviour Change**
Participants are empowered with a new mindset, enabling them to confidently begin their safety journey.
- 2 Interactive Learning Methodology**
Games, insightful content and a plant walkabout.
- 3 Opportunity to Implement Skills**
Conduct observations at the end of the course and develop an improvement plan for a team or site.
